

CYBER THREAT DETECTOR

AI-Powered Threat Detection & Security Intelligence Platform — Executive Report

Generated: 2026-09-21 13:46:07 UTC	Analyst: SOC Incident Responder
Total Events Evaluated: 20	Security Health Score: 69.1/100

1. Executive Summary & Threat Breakdown

Defensive security inspection evaluated a total of 20 security records across the target environment. A total of 15 potential threats were identified by the hybrid detection engine, including 2 Critical, 3 High, 8 Medium, and 2 Low severity alerts. The composite Security Health Score is established at 69.1/100.

Metric	Value	Risk Implication
Critical Threats	2	Immediate containment and host isolation required
High Threats	3	Prioritized investigation within standard SOC SLA
Medium Threats	8	Suspicious activity, monitor source IP / account
Low / Informational	2	Low risk anomalies, baseline tracking

2. Prioritized Threat Findings

ID	Type	Severity	Score	Source / Entity	Detection Rationale
1	Malicious IP Indicator	CRITICAL	81.0	N/A	Activity associated with known malicious IP 194.26.29.112 (Cobalt Strike...
2	Suspicious Domain	CRITICAL	76.5	x92-malicious-c2.to p	DNS resolution or HTTP request directed to known malicious domain 'x92-m...
3	Data Exfiltration Indicator	HIGH	74.2	192.168.1.88	Abnormally high outbound payload (25.0 MB) transferred from 192.168.1.88...
4	Brute Force Authentication	HIGH	72.0	185.220.101.5	Detected 6 authentication failures originating from source IP 185.220.10...
5	Suspicious Web Request	HIGH	72.0	N/A	URL contains web attack signature (Path traversal, command injection, or...
6	Brute Force Authentication	MEDIUM	26.2	45.33.32.156	Detected 5 authentication failures originating from source IP 45.33.32.1...
7	Suspicious Port Activity	MEDIUM	26.2	192.168.1.88	Network session established on high-risk port 4444 (Metasploit Default L...
8	Suspicious Port Activity	MEDIUM	26.2	185.220.101.5	Network session established on high-risk port 3389 (RDP Exposure / Remot...
9	Malicious IP Indicator	MEDIUM	26.2	185.220.101.5	Activity associated with known malicious IP 185.220.101.5 (Tor Exit Node...
10	Malicious IP Indicator	MEDIUM	26.2	45.33.32.156	Activity associated with known malicious IP 45.33.32.156 (Brute Force Sc...

11	Malicious IP Indicator	MEDIUM	26.2	103.203.57.18	Activity associated with known malicious IP 103.203.57.18 (Credential St...
12	Network Port Scanning	MEDIUM	25.5	185.220.101.5	Source IP 185.220.101.5 probed 6 distinct destination ports in rapid suc...

3. Recommended Defensive Remediations

- 1. Network Perimeter:** Block confirmed malicious source IPs on external firewalls and edge ingress routers.
- 2. Identity & Access Management:** Enforce Multi-Factor Authentication (MFA) and mandate credential resets for accounts subject to brute-force or credential stuffing patterns.
- 3. DNS & Endpoint Security:** Blacklist suspicious DGA domains on local DNS resolvers and trigger automated EDR scans on affected internal endpoints.
- 4. Traffic Monitoring:** Isolate hosts exhibiting high outbound data transfer or uncommon destination port connections (e.g. ports 4444, 1337, 8888).
- 5. Threat Intel Ingestion:** Subscribe internal SIEM/SOC platforms to updated Threat Intelligence feeds for real-time proactive indicator blocking.
